About Me

Product Designer with ~6 years of experience delivering B2B, B2C and SaaS products across large-scale consumer and enterprise ecosystems. Experience spanning automotive, mobility, enterprise platforms and AI-augmented design, including digital products reaching **10M+ monthly users**.

Experience spans **user journey optimisation, product strategy, UX research, design systems and data-driven design across large-scale consumer digital ecosystems.** Technical fluency in HTML, CSS and JavaScript enables effective collaboration with engineering teams.

Work Experience

Frog design studio, Capgemini Invent | Jan 2024 – Mar 2026 | Gurugram, India

Interaction Designer II

- MSIL Arena - Led UX across the unified **Maruti Suzuki digital platform**, serving approximately **10–15M monthly visitors**, with traffic increasing by ~27% following launch. Team size - 15 people. Worked with interns as well as mentoring.
- MSIL Nexa - Designed and optimised key user journeys, contributing to a **34% increase in user engagement within the first month.**
- MSIL Corporate / Parts & Accessories - Redesigned key dashboards and user journeys across the digital ecosystem, using AI-assisted research and data analysis to identify friction and inform product improvements.
- Indigo - Understood problem and helped heuristic evaluation for mobile/web experiences, using analytics and behavioural insights to identify opportunities for improving user journeys and traffic.

Tata Consultancy Services | Jul 2021 – Dec 2023 | Gurugram, India

UI/UX Designer

- Dashboards, KPIs - TCS Internal MassCOM - Redesigned the User Information Relay system, reducing task failure rates by **17%** while maintaining workforce efficiency at nearly **70% of usual daytime traffic.**
- CRM Tool - Crisis Management - Conducted user research, databasing and UX optimisation focused on retention, contributing to **up to 20% higher user retention** and **15% faster response times**.
- **Led internal and client presentations**, coordinating with cross-functional stakeholders and international clients to communicate design decisions and project outcomes.

Siemens | Jul 2020 – May 2021 | Bengaluru, India

UX Research Intern

- Conducted UX research for Mixed Reality and Virtual Reality experiences, exploring emerging interaction paradigms and user behaviours.

- Siemens MR/VR Socio-economic Systems — Research case study available on request.

Independent / Freelance Product Design

Selected Client Work

- Apparel UI/UX - Designed the digital ecosystem spanning social media, web experience, packaging and customer engagement touchpoints.

Education

M.Des, Industrial Design (UI/UX Specialisation) — IIT Delhi **|** 2019–2021

B.Arch, Architecture — Jamia Millia Islamia **|** 2014–2019

Core Skills

Product Strategy · UX Research · Interaction Design · Design Systems · Information Architecture · Usability Testing · Data-Driven Design · AI-Augmented Design

Applied generative AI across ideation, visual exploration, research synthesis, content generation and workflow optimisation.

- AI-Powered Research & Databasing: Used AI to structure, analyse and synthesise large datasets, turning complex information into actionable design insights
- AI-Assisted Design Systems: Leveraged AI to maintain consistency across components, documentation and scalable design workflows.
- Prompt Engineering: Developed structured prompts and iterative workflows to improve the quality, consistency and relevance of AI-generated outputs.
- AI Workflow Automation & Validation: Identified repetitive tasks for AI-assisted automation and used AI to cross-reference information, validate outputs and improve design accuracy.
